PROFESSIONAL SUMMARY

Data Analyst with hands-on project experience using Excel, Power BI, SQL, Python, and MySQL to clean, model, analyze, and visualize data. Developed dashboards, relational databases, and analytical workflows across sales, inventory, education, and household operations. Skilled in exploratory analysis, data quality checks, KPI reporting, DAX, Power Query, and translating findings into clear business insights.

TECHNICAL SKILLS

Analytics & BI: Power BI, DAX, Power Query, dashboards, KPI tracking, data modeling, descriptive statistics, trend analysis

Excel: PivotTables, XLOOKUP, INDEX/MATCH, SUMIFS, FILTER, conditional formatting, charts, data validation

SQL & Programming: MySQL, JOINs, CASE, GROUP BY, aggregations, relational databases, Python, pandas, NumPy, Jupyter Notebook

Data Quality: data cleaning, date standardization, validation, anomaly investigation, reporting, documentation

SELECTED DATA ANALYTICS PROJECTS

Executive Retail Sales Dashboard | Power BI, DAX, Power Query

- Built dashboard views for sales, profit, profit margin, regional/category performance, and monthly trends.
- Created DAX measures and calendar-based calculations; implemented slicers and customer/product performance views.
- Cleaned inconsistent order-date formats and data types using Power Query.

Retail Inventory Management Database | MySQL, SQL

- Designed related supplier, product, and inventory tables and queried stock and product performance.
- Used JOINs, CASE statements, filtering, and aggregations to produce inventory KPIs and analytical summaries.

Smart Household Chore Optimizer | Python, MySQL

- Created task and task-history tables; connected Python to MySQL for retrieval and analysis.
- Analyzed weekly workload, task categories, and repetitive activities to explore more efficient scheduling.

Student Performance Reporting | Excel

- Calculated totals, averages, and grades; highlighted low attendance and at-risk performance using rules.
- Produced performance charts and conditional-formatting views to support academic monitoring.

Data Cleaning and Time Intelligence Practice | Power BI

- Standardized mixed date formats using Power Query and locale-based conversion methods.
- Developed calendar tables and DAX calculations for time-based sales comparisons and cumulative reporting.

Dynamic Product and Geographic Lookup Workbook | Excel

- Designed country/state/city-dependent dropdowns with named ranges and INDIRECT validation.
- Used lookup and filtering formulas to retrieve product quantities and prices and calculate totals.

Excel Invoice Automation | Excel

- Built formula-driven invoice retrieval and calculations using FILTER, INDEX/MATCH, and lookup logic.

PROFESSIONAL EXPERIENCE

Customer Service Representative | Whitelist Solutions Company | Jun 2025 – Mar 2026

- Recorded and reviewed high-volume customer inquiries in CRM systems; identified recurring complaint patterns and escalated complex cases.
- Maintained accurate case documentation and supported timely resolution through structured follow-up.

Quality Control Intern | Vitali Foods | Apr 2023 – Oct 2023

- Monitored production and packaging quality, documented inconsistencies, and supported corrective actions.

EDUCATION

B.Sc., Food Science and Technology | Osun State University | 2019–2024

PROFESSIONAL DEVELOPMENT

Practical training in Microsoft Excel, Power BI, SQL, and Python for data analysis.
